

Registration Form

V.I.P. Attendee Pass

3 Easy Ways to Register!

1. Register online at www.nodigshow.com
Go to the registration tab and when prompted enter "FreePass" as the discount code.
2. Fax your completed pass to: 330-468-2289
3. Mail your completed pass to:
Benjamin Media Inc.
PO Box 190 Peninsula, OH 44264
Attn: Conferences Division
4. Bring your completed pass onsite:
Gaylord National Hotel & Convention Center

Choose one registration option:

- Register for the Full Conference, the best value for your money, for the early NASTT Member rate of \$500 (Non-member rate: \$700). Early registration rates end 2/25/11.
- Register for one of the specialized seminars:
_____ for the early rate of \$300. This option also includes admission to the exhibit hall for FREE. Early registration rates end 2/25/11.
- Register for the 3-Day Exhibition Pass, including the 10th Annual Educational Auction for FREE, a \$20 value. Exhibit Hall is open March 28-30.

NASTT's 2011 No-Dig Show

March 27-31, 2011
Gaylord National Hotel
& Convention Center
Washington, D.C.

Presented by the North American
Society for Trenchless Technology.
Managed by Benjamin Media Inc.

www.nodigshow.com

Agenda

This V.I.P. TRADE SHOW PASS is your ticket to attend the largest trenchless technology exhibition in North America – No-Dig 2011 sponsored by the North American Society for Trenchless Technology (NASTT), March 27-31, 2011 at the Gaylord National Hotel & Convention Center, Washington, D.C.

You are invited to attend the following No-Dig Show events **FREE** of charge:

Monday, March 28

11:45 am – 3:45 pm

Exhibit Hall Grand Opening & Ribbon Cutting Ceremony
Exhibit Hall Open

6:15 pm – 7:30 pm

NASTT 10th Annual Educational Fund Auction & Reception. Bid on fabulous items, mingle with colleagues and make this 10th annual auction a successful fundraiser for continuing education in the industry. Past auctions have contributed over \$356,000 to the Educational Fund for support of student chapters, industry research and training and other activities supporting our mission to advance the trenchless industry.

Tuesday, March 29

12:00 pm – 3:30 pm

Exhibit Hall Open

Wednesday, March 30

10:00 pm – 12:30 pm

Exhibit Hall Open

There's even more for you to experience at No-Dig 2011. Make the most of your trip and register for the full conference, the best value for your money! For a full schedule of events including technical papers, specialized seminars and networking events, call 330.467.7588 or visit www.nodigshow.com

This FREE pass is non-transferable and is not good for food or drink served during the dates and times listed on the pass. You must be at least 18 years of age.

Welcome To No-Dig 2011!

2011 Exhibitors (As of 9/15/10)

Specialized Seminars*

Specialized Seminars*

Washington, D.C. will host the 20th Annual NASTT No-Dig Show at the Gaylord National Hotel & Conference Center March 27-31, 2011. The last time the No-Dig Show was in D.C. was in 1992 with our parent organization the International Society for Trenchless Technology. At that time, NASTT was a fledgling organization with the mission of developing trenchless training applications and educating owners, operators and designers of the benefits associated with this new construction science.

Twenty years have passed and we are still growing. Our membership continues to push the envelope on the uses and benefits of a trenchless approach to resolving infrastructure problems in the United States, Canada and Mexico.

The theme for the 2011 conference – **Trenchless – The Sustainable Solution** – emphasizes our point. Trenchless is no longer the “experimental” technology of 20 years ago; it has been proven in our municipalities time and time again. NASTT will be 21 years old in 2011, and we continue to grow our ability to service our membership and our communities, plus provide the type of information and forum required to engage the industry.

The Only Event in the Industry Devoted Exclusively to Trenchless Technology.

By attending this event, you will be a part of an unequalled technical program, outstanding entertainment, networking opportunities and an exhibition that includes cutting-edge innovations and new products used solely in the trenchless industry.

- Over 120 Peer-Reviewed Technical Papers will be presented.
- No-Dig also offers Pre- & Post- Specialized Seminars for those who would like to come early and stay late.
- The exhibit hall will feature over 125 exhibiting companies, providing an opportunity for attendees to learn more about the various products, services and trenchless equipment available to them.
- Register for the Full Conference and enjoy great food and entertainment during the exciting networking opportunities.

For additional information, contact Benjamin Media Inc. at: 330.467.7588 or visit www.nodigshow.com

Hotel Information

Location: Gaylord National Resort & Convention Center
Address: 201 Waterfront Street, National Harbor, MD 20745 USA
Main Phone: (301) 965-4000 **Fax:** (301) 965-2001
Rates: Standard (Single, Double) \$199, Triple \$219, Quad \$239, Student (Single, Double, Triple or Quad) \$199, 6% sales tax, 10% occupancy tax, \$15 resort fee includes first 20 minutes of phone calls, daily paper, (2) bottled waters and high speed internet access in each room.
Reservations: (301) 965-2000 (mention No-Dig Show when calling)
Cut Off Date: March 4, 2011
Cancellation: Cancellations within 72 hours will not receive a refund of the \$199 deposit.

Sunday, March 27

NASTT's Introduction to Trenchless Technology Short Course
This introductory short course is ideally suited for both newcomers to the industry and for anyone who is interested in seeking a refresher course on trenchless technology methods. The first session covers new construction techniques – microtunneling, HDD, pipe jacking, auger boring and pipe ramming. The rehabilitation session provides an overview of the methods available to public works and sewer agencies to rehabilitate water and sewer systems without the need for excavation.

Wednesday, March 30 – Thursday, March 31

NASTT's Cured-In-Place Pipe Good Practices Course
Cured-In-Place Pipe (CIPP) technology is an effective trenchless pipeline rehabilitation method that may help to address many of your city's water and wastewater problems. CIPP is one of the most widely used and accepted pipeline rehabilitation methods. It significantly reduces infiltration and ex-filtration. CIPP is cost-effective and increases flow capacity. And because it is trenchless, traffic congestion and site disruption are significantly reduced.

Wednesday, March 30 – Thursday, March 31

NASTT's Laterals Good Practices Course
Millions of sewer laterals – the portion of sewer networks that connect individual properties to the public sewer network – exist throughout the United States and elsewhere. Many laterals have not been maintained and as a result, allow a significant amount of inflow and infiltration (I/I) into sewer systems, which can lead to sanitary sewer overflows, increased costs and damage. Consequently, there is a compelling need to solve I/I problems of sewer laterals.

NEW Course Material! The course material has been recently updated to include new technology developments and utility experience in terms of managing the legal and financial issues associated with private lateral sewer programs. Information on the actual savings in I/I reduction being realized through lateral rehabilitation programs will also be presented.

Wednesday, March 30 – Thursday, March 31

HDD Consortium Horizontal Directional Drilling Good Practices Guidelines Course

If you have horizontal directional drilling questions or concerns, then we have the answers for you! The HDD Good Practices Guidelines Course presents a unique opportunity for you to learn the key elements of a successful HDD project from planning to job completion, as well as to meet with a number of HDD specialists in the field who can help answer your questions and concerns not outlined in the course agenda.

Wednesday, March 30 – Thursday, March 31

NASTT's Pipe Bursting Good Practices

Pipe bursting is the perfect no-dig process to replace an existing line with a completely new, larger pipe – without excavating. This construction technique is recognized as one of the only methods of trenchless rehabilitation that replaces an existing line with a completely new pipe, providing a total pipe replacement and allows for the replacement of an existing pipe with a new line of equal or larger diameter – to maintain or increase flow capabilities.

Wednesday, March 30 – Thursday, March 31

NASTT's New Installation Methods Good Practices: Application of Grade, Alignment Control, Guidance

The New Installation Methods Course addresses trenchless methods commonly used to install new pipe and casing. These methods include: (1) auger boring; (2) pipe ramming; (3) pipe jacking; and (4) the pilot tube method. Examples and case studies will be presented to assist attendees in determining which method is preferable to use under various project conditions and requirements.

NASSCO

The National Association of Sewer Service Companies, formed in 1976, sets the industry standards for the rehabilitation of underground utilities through education, technical resources, and industry advocacy. To find out more about NASSCO visit nassco.org or e-mail: andrea@nassco.org.

Thursday, March 31

NASSCO PACP Trainer Recertification

This class is for current PACP trainers who have not met the requirements to be automatically recertified. This one-day class will ensure the trainer is able to correctly arrange for, conduct and complete PACP classes. Registration for this course is not a guarantee until you receive approval from NASSCO.

NASSCO PACP Trainer Upgrade

This class is for PACP users who have been certified for at least 6 months. This one-day class will prepare the student to arrange, conduct and complete PACP classes. Registration for this course is not a guarantee until you receive approval from NASSCO.

Thursday, March 31 – Saturday, April 2,

NASSCO Pipeline Assessment and Certification Program – Including Manholes & Laterals

This three-day, comprehensive training program will demonstrate to municipalities, engineers and contractors the benefits and impact of PACP, which provides standardization for the inspection industry. The training and certification of operators, technicians and engineers on understanding and implementing the PACP coding system is critical to the standardization process.

To register for the NASSCO courses, contact Heather Myers at heather@nassco.org or call 410-486-3500.

Visit www.nodigshow.com for detailed course agendas. Please note there is a separate registration fee to attend the above courses.

*Note: Specialized Seminars are not included in the full conference rate and can be purchased at an additional fee.
